### ABSTRACT

This paper's main objective is to analyze factors that influence the practice of Islamic leadership values among government sectors in Putrajaya. The variables considered are problem solving, decision making, communication, and motivation. The sample of this study comprises of 150 respondents of government sectors. A set of questionnaire will be distributed to each of the respondents. The objective of this research is to analyze factors that influence the practice of Islamic leadership values among government sector. The result indicated that (problem solving, decision making, communication and motivation) can influence the practices of Islamic leadership values. In this research, questionnaire has distributed around 150 questionnaires to the staffs of government sector from various government sector in Putrajaya. It is suggested that future research can be done in private sector and the result that we get will be more comparable and provide workable direction in Islamic leadership.

**Keywords:** Islamic Leadership, Leadership, Islamic Management.
